

## Diesel - Qmax 44 m<sup>3</sup>/h (190 USgpm) - Hmax 33 m (108 ft)

## VAR - Self-priming centrifugal pumps

These self-priming centrifugal pumps are for applications where the main feature is the difficulty in priming. Even with suction heights of several meters the machine quickly evacuates the air from the suction pipe and starts pumping. Additionally, thanks to the semi-open impeller, the VAR range is also suitable for pumping liquids with solids in suspension.

## **Applications**

Both Atlas Copco and Varisco have decades of experience in designing and producing pumps. We have put those years of expertize into providing a solutions portfolio that works across multiple applications. The VAR range is packed with features that not only meet, but exceed the needs of the market. We are focused on an efficient, extremely versatile pump that is suitable for many industries, including construction, general dewatering and emergency applications, such as flood clean up.

## **Benefits**

#### **Rapid self-priming**

Without foot valve up to a height of 7.5 m (24.5 ft)

### High resistance

To abrasive liquids and turbid sandy waters

#### Semi-open impeller

Solids handling up to 25 mm (1")

Easy maintenance Removable front cover for direct access to the impeller

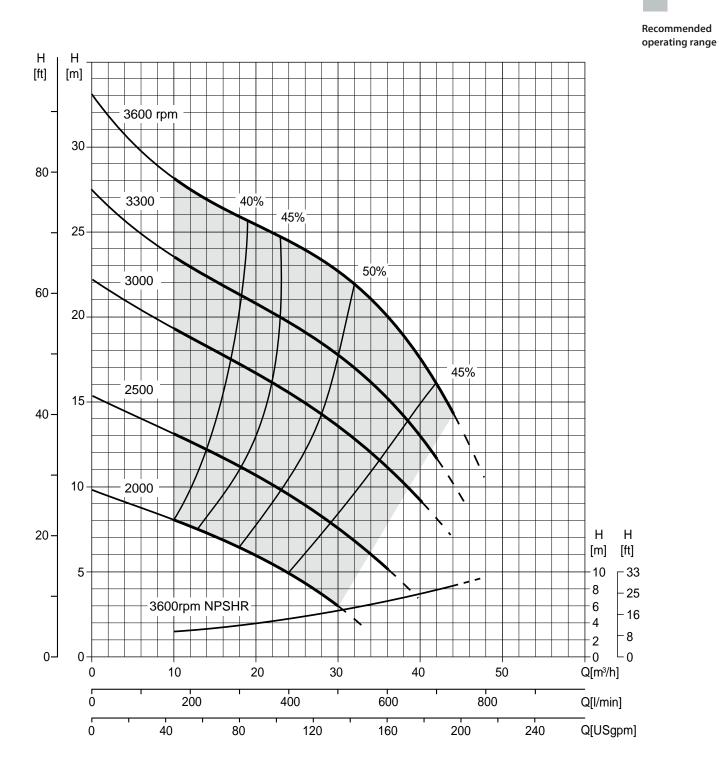

#### Wear plate

Cast iron or stainless steel (F10) wear plate, that is easily replaceable

## **Performance curves**

Test according to UNI EN ISO 9906 standard - level 2 Test liquid: clean water, density 1,000 kg/m<sup>3</sup> Spherical solids handling: D.25 mm (1") Priming time: 20 s from 1,5 m (4.9 ft) Max absorbed power: 4,3 kW - 5.8 HP (3.600 rpm)
